I have read the SWCD's tree replacement policy & fully understand its provisions. I understand I will have to furnish a tractor & driver for the tree planter. I understand this contract is binding on both parties & can only be cancelled or altered by mutual agreement between the Soil & Water Conservation District and the purchaser. In the unlikely event that a dispute arises, the undersigned purchaser explicitly agrees to waive any form of sovereign immunity, including purchaser's status as a member of a tribe, and explicitly consents to the jurisdiction of the courts of the State of Minnesota in the interpretation and enforcement of this contract:

Purchaser Signature _____ Date _____

A 25% down payment is required on all orders of \$100.00 or more. Full payment is required under \$100.00 except those to be planted by District which will require a 25% down payment.

TREE PROGRAM POLICY

1. Replacement will be made in spring for trees that were planted in the preceding spring unless otherwise agreed upon in writing.
2. Replacement trees will be provided only if tree planting has been cared for in a good husband-like manner.
3. The SWCD office does not guarantee that trees will survive drought, animal or insect damage, mechanical or chemical injury, weed competition, or improper planting. However, if the trees were improperly planted by SWCD staff then tree replacement will be honored. Ground preparation prior to planting is required. Trees or shrubs planted in sod are not guaranteed.
4. Containerized or potted conifers larger than 18" in height are not guaranteed by the district.
5. Replacement tree survival is not guaranteed.
6. The SWCD office must be notified of needed replacements no later than September 1. A postcard reminder will be sent prior to August 1. Failure to notify this office by the September 1st deadline will result in forfeiture of replacements.
7. Replacements will be set aside only if payment in full has been received by August 30, or other arrangements for payment have been made.
8. Upon notification, one day in April or May will be designated for replacement tree pick-up. Unless arrangements are made prior to these days, replacement trees will be forfeited. Potted stock is to be picked up during designated tree pick-up days.
9. Tree mortality from September 1 to arrival of planting stock in spring is not guaranteed.
10. Replacement tree planting service will be offered only where entire tree rows have died. Planting charges are \$.30 per tree for bare root trees and \$2.00 per tree will be charged for trees hand-planted by district staff with a minimum charge of \$100.00.
11. All orders should be placed by March 1 and are subject to availability. No refunds for tree orders, tree mats and tree tubes.
12. All planting will be subject to inspection by SWCD personnel.

****TREES PURCHASED FROM THE DISTRICT
MUST BE USED FOR CONSERVATION PURPOSES ONLY.****

TREES AND SHRUBS MUST BE WATERED IMMEDIATELY AFTER PLANTING

Trees and shrubs should be soaked to the depth of five inches. One- and two-year old plantings will need water of some source at least once a week--more if it is an extra dry year.

COST-SHARED WINDBREAKS

During the first three years, the trees should be kept cultivated between the rows. Weeds and grasses must be controlled within the rows. If trees die out, they must be replaced to meet the original specifications. Spot checks will be made regularly.

TREE AVAILABILITY

The Redwood SWCD Board reserves the right to reduce or cancel this order if sufficient stock is not available. Down payment will be adjusted or refunded accordingly.

PAYMENT REQUIREMENTS

A 25% DOWN PAYMENT IS REQUIRED ON ALL TREE ORDERS OVER \$100.00. PAYMENT IN FULL WILL BE REQUIRED ON ALL TREE SALES UNDER \$100.00 AT THE TIME OF PURCHASE, EXCEPT THOSE TO BE PLANTED BY THE DISTRICT WHICH WILL REQUIRE A 25% DOWN PAYMENT. THERE WILL BE A 1 1/2% INTEREST CHARGE ADDED ON ALL ACCOUNTS NOT PAID BY JULY 31ST.

The mission of the Redwood Soil and Water Conservation District is to educate and assist the citizens of Redwood County to efficiently and economically manage the soil and water resources of the county for present and future generations.
